A Class by Themselves? Jason Ellis 2019-03-14 In *A Class by Themselves?*, Jason Ellis provides an erudite and balanced history of special needs education, an early twentieth century educational innovation that continues to polarize school communities across Canada, the United States, and beyond. Ellis situates the evolution of this educational innovation in its proper historical context to explore the rise of intelligence testing, the decline of

child labour and rise of vocational guidance, emerging trends in mental hygiene and child psychology, and the implementation of a new progressive curriculum. At the core of this study are the students. This book is the first to draw deeply on rich archival sources, including 1000 pupil records of young people with learning difficulties, who attended public schools between 1918 and 1945. Ellis uses these records to retell individual stories that illuminate how disability filtered down through the school system's many nooks and crannies to mark disabled students as different from (and often inferior to) other school children. *A Class by Themselves?* sheds new light on these and other issues by bringing special education's curious past to bear on its constantly contested present.

Labor's Love Lost Andrew J. Cherlin
2014-11-16 Two generations ago, young men and women with only a high-school degree would have entered the plentiful industrial occupations which then sustained the middle-class ideal of a male-breadwinner family. Such jobs have all but vanished over the past forty years, and in their absence ever-growing numbers of young adults now hold precarious, low-paid jobs with few fringe benefits. Facing such insecure economic prospects, less-educated young adults are increasingly forgoing marriage and are having children within unstable cohabiting relationships. This has created a large marriage gap between them and their more affluent, college-educated peers. In *Labor's Love Lost*, noted sociologist Andrew Cherlin offers a new

historical assessment of the rise and fall of working-class families in America, demonstrating how momentous social and economic transformations have contributed to the collapse of this once-stable social class and what this seismic cultural shift means for the nation's future. Drawing from more than a hundred years of census data, Cherlin documents how today's marriage gap mirrors that of the Gilded Age of the late-nineteenth century, a time of high inequality much like our own. Cherlin demonstrates that the widespread prosperity of working-class families in the mid-twentieth century, when both income inequality and the marriage gap were low, is the true outlier in the history of the American family. In fact, changes in the economy, culture, and family formation in recent decades have been so great that Cherlin suggests that the working-class family pattern has largely disappeared.

Labor's Love Lost shows that the primary problem of the fall of the working-class family from its mid-twentieth century peak is not that the male-breadwinner family has declined, but that nothing stable has replaced it. The breakdown of a stable family structure has serious consequences for low-income families, particularly for children, many of whom underperform in school, thereby reducing their future employment prospects and perpetuating an intergenerational cycle of economic disadvantage. To address this disparity, Cherlin recommends policies to foster educational opportunities for children and adolescents from disadvantaged families. He also stresses the need for labor market interventions, such as subsidizing low wages through tax credits and raising the minimum wage. Labor's Love Lost provides a compelling analysis of the historical dynamics and ramifications of the growing

number of young adults disconnected from steady, decent-paying jobs and from marriage. Cherlin's investigation of today's "would-be working class" shines a much-needed spotlight on the struggling middle of our society in today's new Gilded Age.

Patient Safety and Quality 2008 "Nurses play a vital role in improving the safety and quality of patient care -- not only in the hospital or ambulatory treatment facility, but also of community-based care and the care performed by family members. Nurses need know what proven techniques and interventions they can use to enhance patient outcomes. To address this need, the Agency for Healthcare Research and Quality (AHRQ), with additional funding from the Robert Wood Johnson Foundation, has prepared this comprehensive, 1,400-page, handbook for nurses on patient safety and quality -- Patient Safety and Quality: An Evidence-Based Handbook for Nurses. (AHRQ Publication No. 08-0043)."--Online
