*Happier at Home* - Gretchen Rubin 2012-09-04  
Tolstoy wrote, "Happy families are all alike; every unhappy family is unhappy in its own way." This is the statement that inspired bestselling author Gretchen Rubin to wonder whether she could foster an even greater happiness in her home. During The Happiness Project, the same questions

kept tugging at her. How can I raise happy children? How can I maintain a tender, romantic relationship with my spouse--after fifteen years of marriage? How do I keep my Blackberry from taking over my private life? How can I foster a well-ordered, light-hearted atmosphere in my house, when no one else will lift a finger to cooperate? This book is

Gretchen's account of her second journey in pursuit of happiness. Prescriptive, easy-to-follow, and anecdotal, *Happier at Home* offers readers a way of thinking and being that is positive and life-affirming. With specific examples following the calendar year, an intimate voice, and drawing from science and pop culture, this book will resonate with anyone looking to strengthen the bonds of family.

Concepts of Biology -

Samantha Fowler 2018-01-07

*Concepts of Biology* is designed for the single-semester introduction to biology course for non-science majors, which for many students is their only college-level science course. As such, this course represents an important opportunity for students to develop the necessary knowledge, tools, and skills to make informed decisions as they continue with their lives. Rather than being mired down with facts and vocabulary, the typical non-science major student needs information presented in a way that is easy to read and understand. Even more importantly, the content should be meaningful. Students do much better when they understand why biology is relevant to their everyday lives. For these reasons, *Concepts of Biology* is grounded on an evolutionary basis and includes exciting features that highlight careers in the biological

sciences and everyday applications of the concepts at hand. We also strive to show the interconnectedness of topics within this extremely broad discipline. In order to meet the needs of today's instructors and students, we maintain the overall organization and coverage found in most syllabi for this course. A strength of Concepts of Biology is that instructors can customize the book, adapting it to the approach that works best in their classroom. Concepts of Biology also includes an innovative art program that incorporates critical thinking and clicker questions to help students understand--and apply--key concepts.

The Dead Cat Bounce - Sarah Graves 2009-10-07

dead cat bounce n. Stock market jargon for a small, temporary rise in a stock's trading price after a sharp drop. Since she bought her rambling old fixer-upper of a house, Jacobia Tiptree has gotten used to finding things broken. But her latest problem

isn't so easily repaired. Along with the rotting floor joists and sagging support beams, there's the little matter of the dead man in Jake's storeroom, an ice pick firmly planted in his cranium. Not much happens in her tiny Maine town, but that's about to change. Jake's unknown guest turns out to be a world-famous corporate raider, local boy turned billionaire Threnody McIlwaine. When Jake's best friend, quiet and dependable Ellie White, readily confesses to the murder, cops and journalists swarm into snowbound Eastport. Jake smells a cover-up, and begins poking into past history between McIlwaine and Ellie's family. But someone doesn't like nosy neighbors...and Jake's rustic refuge may become her final resting place.

puppets, and also clearly shown how they may be used in appropriate settings. With the idea of giving assistance to the novice, and help to the more advanced student, the book is written in plain and concise language the diagrams and photographs should explain the intricacies of puppet-making, leaving the individual to fill in the details from his own imagination. Many of the earliest books, particularly those dating back to the 1900s and before, are now extremely scarce and increasingly expensive. Hesperides Press are republishing these classic works in affordable, high quality, modern editions, using the original text and artwork.

#### **Morphology** - Andrew

Carstairs-McCarthy 2017-12-20

What exactly are words? Are they the things that get listed in dictionaries, or are they the basic units of sentence structure? Andrew Carstairs-McCarthy explores the implications of these different approaches to words in English. He explains the various ways in which words are related to one another, and shows how the history of the English language has affected word structure. Topics include: words, sentences and dictionaries; a word and its parts (roots and affixes); a word and its forms (inflection); a word and its relatives (derivation); compound words; word structure; productivity; and the historical sources of English word formation.

*The System of Objects* - Jean Baudrillard 2020-04-07

The System of Objects is a tour de force—a theoretical letter-in-a-bottle tossed into the ocean in 1968, which brilliantly communicates to us all the live ideas of the day. Pressing Freudian and Saussurean categories into the service of a basically Marxist perspective, The System of Objects offers a cultural critique of the commodity in consumer society. Baudrillard classifies the everyday objects of the

“new technical order” as functional, nonfunctional and metafunctional. He contrasts “modern” and “traditional” functional objects, subjecting home furnishing and interior design to a celebrated semiological analysis. His treatment of nonfunctional or “marginal” objects focuses on antiques and the psychology of collecting, while the metafunctional category extends to the useless, the aberrant and even the “schizofunctional.” Finally, Baudrillard deals at length with the implications of credit and advertising for the commodification of everyday life. The System of Objects is a tour de force of the materialist semiotics of the early Baudrillard, who emerges in retrospect as something of a lightning rod for all the live ideas of the day: Bataille’s political economy of “expenditure” and Mauss’s theory of the gift; Reisman’s lonely crowd and the “technological society” of Jacques Ellul; the structuralism of Roland Barthes in The

Jick McCaskill, the illustrious narrator of English Creek, returns as the witty and moving voice in this classic encounter with the American road and all the rewards and travails it can bring. Jick faces his family's—and his state's—legacy of loss and perseverance from the vantage point of Montana's centennial in 1989 when his daughter Mariah enlists him as Winnebago chauffeur to her and her ex-husband, the magnificently ornery and eloquent columnist Riley Wright, when their news-paper dispatches them to dig up stories of the "real Montana."
