dishwasher repair help troubleshooting and parts

1 no water make sure you get water to the dishwasher check to see if the water shut off valve located under the sink is open if you get water to the dishwasher but there is still no water inside during the fill cycle the problem might be with a faulty water valve located at the bottom of the dishwasher behind the kick panel on either side in which case replace the water valve

oven and range repair help troubleshooting and parts

note one of the exceptions could be that your oven is set to automatic mode instead of manual if this is the case set your oven to manual mode and check again if the bake igniter glows red and not bright yellow or white it is probably because it is too weak when this happens the safety valve would not let the gas out into the oven burner
