Remote Sensing of the Cryosphere M. Tedesco 2015-01-27
The cryosphere, that region of the world where water is temporarily or permanently frozen, plays a crucial role on our planet. Recent developments in remote sensing techniques, and the acquisition of new data sets, have resulted in significant advances in our understanding of all components of the cryosphere and its processes. This book, based on contributions from 40 leading experts, offers a comprehensive and authoritative overview of the methods, techniques and recent advances in applications of remote sensing of the cryosphere. Examples of the topics covered include: * snow extent, depth, grain-size and impurities * surface and subsurface melting * glaciers * accumulation over the Greenland and

Antarctica ice sheets * ice thickness and velocities * gravimetric measurements from space * sea, lake and river ice * frozen ground and permafrost * fieldwork activities * recent and future cryosphere-oriented missions and experiments All figures are in color and provide an excellent visual accompaniment to the technical and scientific aspect of the book. Readership: Senior undergraduates, Masters and PhD Students, PostDocs and Researchers in cryosphere science and remote sensing. Remote Sensing of the Cryosphere is the significant first volume in the new Cryosphere Science Series. This new series comprises volumes that are at the cutting edge of new research, or provide focussed interdisciplinary reviews of key aspects of the science.

The King's Cathedral Judith Curthoys 2019-10-03 The cathedral church of Christ in Oxford - better known as Christ Church Cathedral - was established in 1546. It forms one half of Christ Church, the unique joint foundation of cathedral and university college created by King Henry VIII. Today's cathedral occupies the site of a monastery founded in the late seventh century by Frideswide, patron saint of Oxford and its university. In the early twelfth century it was re-founded as an Augustinian priory, and 400 years later it met its nemesis in Cardinal Thomas Wolsey, whose plan for an Oxford college grander than any other caused its dissolution. But when the cardinal fell from royal favour, the priory church was saved. The King's Cathedral is the first account of the convent, priory and cathedral for nearly a century. Judith Curthoys - author of two previous volumes on Christ Church - has drawn widely on scholarly research into the cathedral's archaeology, architecture and history for her

fascinating and accessible new study of this historic building.

City of the Sharp-Nosed Fish Peter Parsons 2012-10-18 How an ancient rubbish dump has given us a unique view of life 2,000 years ago In 1897 two Oxford archaeologists began digging a mound south of Cairo. Ten years later, they had uncovered 500,000 fragments of papyri. Shipped back to Oxford, the meticulous and scholarly work of deciphering these fragments began. It is still going on today. As well as Christian writings from totally unknown gospels and Greek poems not seen by human eyes since the fall of Rome, there are tax returns, petitions, private letters, sales documents, leases, wills and shopping lists. What they found was the entire life of a flourishing market-town - Oxyrhynchos (the 'city of the sharp-nosed fish'), - encapsulated in its waste paper. The total lack of rain in this part of Egypt had preserved the papyrus beneath the sand, as nowhere else in the Roman Empire. We hear the voices of barbers, bee-keepers and boat-makers, dyers and donkey-drivers, weavers and wine-merchants, set against the great events of late antiquity: the rise and fall of the Roman Empire and the coming of Christianity. The result is an extraordinary and unique picture of everyday life in the Nile Valley between Alexander the Great in 300 BC and the Arab conquest a thousand years later.

Supplementum Hellenisticum Hugh Lloyd-Jones 1983 The series publishes important new editions of and commentaries on texts from Greco-Roman antiquity, especially annotated editions of texts surviving only in fragments. Due to its programmatically wide range the

series provides an essential basis for the study of ancient literature.

A Million Died! Alfred Wagg 1945

The Great American Heritage Bela Kornitzer 1955 David J. Eisenhower was born 23 September 1863. His parents were Jacob Frederick Eisenhower (1826-1906) and Rebecca Matter (1825-1890). He married Ida Elizabeth Stover (1862-1946), daughter of Simon P. Stover (1822-1873) and Elizabeth Ida Link (1822-1867), 23 September 1885 in Kansas. Details the lives of their six sons, Arthur, Edgar, Dwight, Roy, Earl and Milton. Places more emphasis on Dwight, who was President of the United States at the time of writing.

Secrets of German Espionage Bernard Newman 2021-08-31
"Secrets of German Espionage" by Bernard Newman.

Published by Good Press. Good Press publishes a wide range of titles that encompasses every genre. From well-known classics & literary fiction and non-fiction to forgotten—or yet undiscovered gems—of world literature, we issue the books that need to be read. Each Good Press edition has been meticulously edited and formatted to boost readability for all e-readers and devices. Our goal is to produce eBooks that are user-friendly and accessible to everyone in a high-quality digital format.

Being U 4Real! Carmen Thomas 2013-03-06 This book will empower you to bring clarity, balance and direction to your life. If you apply the principles in each chapter you will begin to have the courage to define your true identity and release your dreams into the atmosphere. The book is very simple, but powerful! I dare you to take the step towards defining the "BEST U & DO U 4REAL" I celebrate the authenticity on the inside of you!

Suez and Panama André Siegfried 1940

Landscape Modelling and Decision Support Wilfried Mirschel 2020-03-02 This book contributes to a deeper understanding of landscape and regional modelling in general, and its broad range of facets with respect to various landscape parameters. It presents model approaches for a number of ecological and socio-economic landscape indicators, and also describes spatial decision support systems (DSS), frameworks, and model-based tools, which are prerequisites for deriving sustainable decision and solution strategies for the protection of comprehensively functioning landscapes. While it mainly focuses on the latest research findings in regional modelling and DSS in Europe, it also

highlights the work of scientists from Russia. The book is intended for landscape modellers, scientists from various fields of landscape research, university teaching staff, and experts in landscape planning and management, landscape conservation and landscape policy.

Theology and Religion Graham Ward 2019-03-18 Graham Ward argues that the study of theology and religion, as a single academic discipline, plays a vital role in helping us to understand politics, world affairs, and the nature of humanity itself. Religion can be used to justify inhumane actions, but it also feeds dreams, inspires hopes, and shapes aspirations. By invoking a sense of wonder about the natural world, religion can promote scientific discoveries, and by focusing on shared experiences, religion helps to bind societies together. Some scientists now believe that religious feeling might be hard-wired into our DNA, a fundamental aspect of what makes us human. Because religion is rooted in the imagination itself, its study involves staring into the profundities of who we are. Religion will not go away, so it needs to be understood.

The Princess Who Hid in a Tree Jackie Holderness 2019-04-05 This story is about a brave and kind Anglo-Saxon princess called Frideswide who lived in Oxford a

long time ago and just happened to be brilliant at climbing very tall trees. Her talent came in useful one day when a wicked king tried to kidnap her. How did she and her friends escape, and what happened to the king and his soldiers? With stunning illustrations by award-winning artist Alan Marks, Saint Frideswide's legend is retold for young children as a tale of adventure, courage in the face of danger, friendship, and kindness, with a few surprises along the way. The church Frideswide founded in Oxford was on the site of what is now Christ Church, and her medieval shrine can still be seen inside the Cathedral. This beautiful picture book is sure to be treasured by any child who loves tales of adventure. It will appeal to children learning about the Anglo-Saxons, to readers who like feisty heroines and to visitors to Oxford, as a meaningful souvenir of their visit.

Careers in Focus Facts On File, Incorporated 2010 Defines various careers in office work, discussing the nature of the work, educational or training requirements, getting started, advancement possibilities, salary, employment outlook, and sources of more information.

Appeasing Hitler Tim Bouverie 2020-03-19 The Sunday Times Bestseller 'Astonishing' ANTONY BEEVOR 'One of the most promising young historians to enter our field for years' MAX HASTINGS On a wet afternoon in September 1938, Neville Chamberlain stepped off an aeroplane and announced that his visit to Hitler had averted the greatest crisis in recent memory. It was, he later assured the crowd in Downing Street, 'peace for our time'. Less than a year later, Germany invaded Poland

and the Second World War began. This is a vital new history of the disastrous years of indecision, failed diplomacy and parliamentary infighting that enabled Nazi domination of Europe. Drawing on previously unseen sources, it sweeps from the advent of Hitler in 1933 to the beaches of Dunkirk, and presents an unforgettable portrait of the ministers, aristocrats and amateur diplomats whose actions and inaction had devastating consequences. 'Brilliant and sparkling . . . Reads like a thriller. I couldn't put it down' Peter Frankopan 'Vivid, detailed and utterly fascinating . . . This is political drama at its most compelling' James Holland 'Bouverie skilfully traces each shameful step to war . . . in moving and dramatic detail' Sunday Telegraph

Reading: A Very Short Introduction Belinda Jack

2019-04-18 Today many people take reading for granted, but we remain some way off from attaining literacy for the global human population. And whilst we think we know what reading is, it remains in many ways a mysterious process, or set of processes. The effects of reading are myriad: it can be informative, distracting, moving, erotically arousing, politically motivating, spiritual, and much, much more. At different times and in different places reading means different things. In this Very Short Introduction Belinda Jack explores the fascinating history of literacy, and the opportunities reading opens. For much of human history reading was the preserve of the elite, and most reading meant being read to. Innovations in printing, paper-making, and transport, combined with the rise of public education from the late eighteenth century on, brought a dramatic rise in literacy in many parts of the world. Established links between a nation's levels of literacy and its

economy led to the promotion of reading for political ends. But, equally, reading has been associated with subversive ideas, leading to censorship through multiple channels: denying access to education, controlling publishing, destroying libraries, and even the burning of authors and their works. Indeed, the works of Voltaire were so often burned that an enterprising Parisian publisher produced a fire-proof edition, decorated with a phoenix. But, as Jack demonstrates, reading is a collaborative act between an author and a reader, and one which can never be wholly controlled. Telling the story of reading, from the ancient world to digital reading and restrictions today, Belinda Jack explores why it is such an important aspect of our society. ABOUT THE SERIES: The Very Short Introductions series from Oxford University Press contains hundreds of titles in almost every subject area. These pocket-sized books are the perfect way to get ahead in a new subject quickly. Our expert authors combine facts, analysis, perspective, new ideas, and enthusiasm to make interesting and challenging topics highly readable.

The Defence of India Arthur Vincent 1922

The Cut Out Girl Bart van Es 2018-08-14 COSTA BOOK OF THE YEAR AWARD WINNER "The hidden gem of the year . . . Sensational and gripping, and shedding light on some of the most urgent issues of our time, this was our unanimous winner." –Judges of the 2018 Costa Award The extraordinary true story of a young Jewish girl in Holland during World War II, who hides from the Nazis in the homes of an underground network of foster families, one of them the author's grandparents Bart van Es left Holland for England many years ago, but one story from

his Dutch childhood never left him. It was a mystery of sorts: a young Jewish girl named Lientje had been taken in during the war by relatives and hidden from the Nazis, handed over by her parents, who understood the danger they were in all too well. The girl had been raised by her foster family as one of their own, but then, well after the war, there was a falling out, and they were no longer in touch. What was the girl's side of the story, Bart wondered? What really happened during the war, and after? So began an investigation that would consume Bart van Es's life, and change it. After some sleuthing, he learned that Lientje was now in her 80s and living in Amsterdam. Somewhat reluctantly, she agreed to meet him, and eventually they struck up a remarkable friendship, even a partnership. *The Cut Out Girl* braids together a powerful recreation of that intensely harrowing childhood story of Lientje's with the present-day account of Bart's efforts to piece that story together, including bringing some old ghosts back into the light. It is a story rich with contradictions. There is great bravery and generosity--first Lientje's parents, giving up their beloved daughter, and then the Dutch families who face great danger from the Nazi occupation for taking Lientje and other Jewish children in. And there are more mundane sacrifices a family under brutal occupation must make to provide for even the family they already have. But tidy Holland also must

face a darker truth, namely that it was more cooperative in rounding up its Jews for the Nazis than any other Western European country; that is part of Lientje's story too. Her time in hiding was made much more terrifying by the energetic efforts of the local Dutch authorities, zealous accomplices in the mission of sending every Jew, man, woman and child, East to their extermination. And Lientje was not always particularly well treated, and sometimes, Bart learned, she was very badly treated indeed. *The Cut Out Girl* is an astonishment, a deeply moving reckoning with a young girl's struggle for survival during war, a story about the powerful love of foster families but also the powerful challenges, and about the ways our most painful experiences define us but also can be redefined, on a more honest level, even many years after the fact. A triumph of subtlety, decency and unflinching observation, *The Cut Out Girl* is a triumphant marriage of many keys of writing, ultimately blending them into an extraordinary new harmony, and a deeper truth.
