105 Hikes in and Around Southwestern

British Columbia Stephen Hui
2018-05-22 The all-new, expanded follow-up to southwestern British Columbia's best-selling hiking guidebook—now featuring trails on the islands and northern Washington. For nearly fifty years, David and Mary Macaree's iconic 103 Hikes in Southwestern British Columbia has been the province's most popular and most trusted hiking guide, with more than 100,000 copies sold to date. Author Stephen Hui carries on the Macarees' legacy in 105 Hikes in and around Southwestern British Columbia—an all-new, expanded follow-up inspired by their beloved classic. With an additional selection of trails on the Gulf Islands and in Washington's North Cascades, options for hiking with children, and rainy day recommendations, 105 Hikes covers

a wider area and wider range of abilities than its predecessor. Like the Macarees, Hui provides detailed information about how to get to each trailhead (including transit options, where available), distance and elevation gains, estimated hiking times, and points of natural or historical interest. But he also includes all-new features such as an at-a-glance summary of all the hikes in the book; tips for hiking safely and ethically; clear, topographical color maps; a rating system for hike quality and difficulty; Indigenous place names where appropriate; and shorter or longer options for every outing.

Adventure Tourism David Huddart 2019-10-25 This textbook presents a comprehensive overview of the

environmental impacts of various types of adventure tourism and how these can be best managed. This volume follows on from the authors previous textbook – 'Outdoor Recreation: Environmental Impacts and Management' and continues the aim of developing a deeper understanding of how tourist numbers impact the environment and to provide practical solutions to these problems. Combining their own first-hand experience and research with extensive literature review the authors' present several popular adventure tourism destinations from across the globe, including the Arctic, the Himalayas, Africa, Australia and Scotland as case studies. Chapters cover the particular challenges faced by each region: including impacts on animals

and birds; the spread of invasive plant species and diseases; trail impacts on vegetation; impacts on geological, historical and archaeological sites and pollution and waste issues. A discussion and evaluation of the possible management actions for minimising these impacts and how outdoor recreation tourists can be regulated concludes each chapter. This practical and engaging textbook will be invaluable to students and scholars of adventure tourism and outdoor recreation as well as practitioners and managers working in the field.

MORE JOURNEYS OF A LIFETIME Len Coates 2013-07-01
When I wrote my first book, *Journeys of a Lifetime*, in 2004, it reflected how dreams of mine, of visiting unknown places in the United Kingdom, countries across

the North Sea in Europe, and seemingly far off continents of America, Africa, Asia, and Australia became reality. That was mainly due to the advent of air travel, package holidays, and the massive growth of international travel in the second half of the twentieth century. Nine years on from that book, my traveling has continued, and in that time, having seen the arrival of grandchildren, naturally they have joined in some of the journeys. Although places visited in that time include some return trips to old favorites, this book reflects only the new places visited. In particular India, the Middle East, the Far East, and nearer home Eastern Europe, all are featured more this time. Also, as we now have an Aussie part of the family, naturally Australia is also a

regular destination. Although the United Kingdom is much smaller in area than the others, it is packed with wonderful places to visit, so trips at home are still often on the itinerary. In addition, cruising has taken off in the last decade a bit like package deals to Europe did in the 1960s and has added a new dimension to the journeys made. Cruises are featured several times in this book. More Journeys of a Lifetime reflects the further growth in long-haul travel and the massive increase of cruising. Hope you enjoy my further travels around this small world of ours, going on from those early dreams of mine and continuing to do so!

Roadside Geology of Southern British Columbia William Henry Mathews 2010
British Columbia was built by some 500 million years of geologic discord along the western margin of the North American tectonic plate. That turmoil continues today, as the Juan de Fuca tectonic plate inches beneath Vancouver Island, triggering earthquakes and generating the magma that feeds the volcanoes of the Cascades. This book explains the

province's geologic history in simple terms, covering southern British Columbia from the northern tip of Vancouver Island to the BC-Alberta border. Thirty-one descriptive road guides, complete with maps, photographs and diagrams, help you locate and interpret the rocks and landforms visible from the provinces highways and ferry routes. Discover a lava flow that chilled beneath ice, learn how Ripple Rock claimed 24 ships before engineers finally blew it up, and drive across a slow-moving earthflow that has played havoc with roads since the gold-rush days. The book a sense of the geology's importance to everyone who lives in and passes through the province.
