**An Illustrated History of Health and Fitness, from Pre-History to our Post-Modern World** Roy J. Shephard 2014-11-27 This book examines the health/fitness interaction in an historical context. Beginning in primitive hunter-gatherer communities, where survival required adequate physical activity, it goes on to consider changes in health and physical activity at subsequent stages in the evolution of "civilization." It focuses on the health impacts of a growing understanding of medicine and physiology, and the emergence of a middle-class with the time and money to choose between active and passive leisure pursuits. The book reflects on urbanization and industrialization in relation to the need for public health measures, and the ever-diminishing physical demands of the work-place. It then evaluates the attitudes of prelates, politicians, philosophers and teachers at each stage of the process. Finally, the book explores professional and governmental initiatives to increase public involvement in active leisure through various school, worksite, recreational and sports programmes.

*Structures or Why things don't fall down* J. Gordon 2012-12-06 I am very much aware that it is an act of extreme rashness to attempt to write an elementary book about structures. Indeed it is only when the subject is stripped of its mathematics that one begins to realize how difficult it is to pin down and describe those structural concepts which are often called 'elementary'; by which I suppose we mean 'basic' or 'fundamental'. Some of the omissions and oversimplifications are intentional but no doubt some of them are due to my own brute ignorance and lack of understanding of the subject. Although this volume is more or less a sequel to *The New Science of Strong Materials* it can be read as an entirely separate book in its own right. For this reason a certain amount of repetition has been unavoidable in the earlier chapters. I have to thank a great many people for factual information, suggestions and for stimulating and sometimes heated discussions. Among the living, my colleagues at Reading University have been generous with help, notably Professor W. D. Biggs (Professor of Building Technology), Dr Richard Chaplin, Dr Giorgio Jeronimidis, Dr Julian Vincent and Dr Henry Blyth; Professor Anthony Flew, Professor of Philosophy, made useful suggestions about the last chapter. I am also grateful to Mr John Bartlett, Consultant Neurosurgeon at the Brook Hospital. Professor T. P. Hughes of the University of the West Indies has been helpful about rockets and many other things besides. My secretary, Mrs Jean Collins, was a great help in times of trouble. Mrs Nethercot of Vogue was kind to me about dressmaking. Mr Gerald Leach and also many of the editorial staff of Penguins have exercised their accustomed patience and helpfulness. Among the dead, I owe a great deal to Dr Mark Pryor - lately of Trinity College, Cambridge - especially for discussions about biomechanics which extended over a period of nearly thirty years. Lastly, for reasons which must surely be obvious, I owe a humble oblation to Herodotus, once a citizen of Halicamassus.

**Bode: Go Fast, Be Good, Have Fun** Bode Miller 2005-10-18 "I don't master the mountain, I master speed." Coming from Bode Miller, this isn't boasting, it's just the way he lives: fast, honest, and wide open. In this candid book, the two-time Olympic medalist and champion skier shares his story, the secret of his success, and his philosophy of life. Born and raised "off the grid"-without electricity or indoor plumbing-in the cabin built by his father in the woods near Franconia, New Hampshire (pop. 850), Bode is unconventional to the core. The strong values of his simple upbringing, where he and his family had to "invent, grow, or carry in" all the essentials have made Bode unique among today's top sports stars. Bode's approach to life is straightforward: "Get a plan, stick to it, and trust your instincts . . . and almost anything is possible." And practically since birth, the iconoclastic Bode has been achieving the impossible and laying down tracks for others to follow. He revolutionized his sport by adopting new and crossover technologies, such as "shape" skis. He drives his tradition-bound European rivals to distraction, skiing and winning by instinct. His outsider status, killer smile, and outspoken yet laid-back persona have earned him a reputation as the Michael Jordan of skiing. Men's Journal named Bode the second greatest athlete in the world. And in the 2005 season, Bode may have moved up a notch by becoming the first American to win the Overall World Cup Alpine championship in twenty-two years. In short, he is the kind of person everybody wants to know and hang out with. In a book loaded with insight, good humor, and eye-opening stories about the world of competitive skiing, Bode, as always, holds nothing back.

*On Color* David Scott Kastan 2018-01-01 Our lives are saturated by color. We live in a world of vivid colors, and color marks our psychological and social existence. But for all color's inescapability, we don't know much about it. Now authors David Scott Kastan and Stephen Farthing offer a fresh and imaginative exploration of one of the most intriguing and least understood aspects of everyday experience. Kastan and Farthing, a scholar and a painter, respectively, investigate color from numerous perspectives: literary, historical, cultural, anthropological, philosophical, art historical, political, and scientific. In ten lively and wide-ranging chapters, each devoted to a different color, they examine the various ways colors have shaped and continue to shape our social and moral imaginations. Each individual color becomes the focal point for a consideration of one of the extraordinary ways in which color appears and matters in our lives. Beautifully produced in full color, this book is a remarkably smart, entertaining, and fascinating guide to this elusive topic.

**Finding Callidora** Stella Leventoyannis Harvey 2019-10 A horrific betrayal sets the destiny of the Alevizopoulos family, farmers who dare to choose a side, first in the Great War of 1914-1918, then in the Greco-Turkish war of 1919-1922. Theodore, the patriarch, was given a significant plot of fertile farmland in the Peloponnese for his efforts to fight the Ottomans in the Cretan revolution of 1886-1896. After he dies, it is Callidora, the matriarch, who must protect this legacy, raising her children to ensure the land is passed down from one generation to the next. But will the treacherous schemes of a neighbour ever allow this to happen? Survival might mean leaving what is most precious: home. Finding Callidora unfolds against multiple backdrops—the unforgiving terrain of the Anatolia, the isolated Greek islands of Naxos and Crete, the bustling, chaotic streets of Cairo and later the vast expanse of Canada. Reflecting the headlines of the day, the novel follows four generations of the Alevizopoulos family, starting with Callidora's children, Nikos, Vasilis and Katarina. Each will carry and pass on the scars of the original betrayal and their need to find the place where they belong.

Only in Whistler Stephen Vogler 2009 For several weeks in February, the eyes of the world will be on Whistler, BC, as it hosts the 2010 Olympic Winter Games and the appetite for a story to go with the place will be extreme. Stephen Vogler has that story, and in this book he tells it fully for the first time. Vogler is one of those rare Whistlerites who actually grew up in Whistler and he has for some years been running a one-man crusade as writer, broadcaster and author of books to prove his hometown is not only a bona fide community, but a uniquely interesting one. Whistler begins in the days when the town had a mere 500 year-round residents who referred to weekend visitors as "turkeys" or "gorbies." His parents were old-school European alpinists who had given up a comfortable life in Vancouver so they could teach their children how to yodel and schuss in an appropriate setting. People like them, with names like Ples and Wilhelmsen, had developed the ski hill in the 1960s and together formed one of Whistler's founding cultures. The other founding culture was a swarming, partying mass of snow-hippies who lived rent-free in rough squatters' shacks and liked marijuana as much as they didn't like wearing clothes. Their "high" spirits melded with the soberer tradition of the transplanted Tyroleans to produce a hybrid "only in Whistler" character that is equally devoted to serious skiing and unserious living. It was no accident that the first Whistlerite to win an Olympic gold medal also tested positive for cannabis, and successfully defended himself by arguing that just breathing the air in his hometown was enough to put him over the limit. If anybody doubts that story, they won't after reading *Only in Whistler: Tales of a Mountain Town*.

Tom Kundig: Houses Dung Ngo 2006-11-09 "Architect Tom Kundig is known worldwide for the originality of his work. This paperback edition of *Tom Kundig: Houses*, first published in 2006, collects five of his most prominent early residential projects, which remain touchstones for him today. In a new preface written for this edition, Kundig reflects on the influence that these designs continue to have on his current thinking. Each house, presented from conceptual sketches through meticulously realized details, is the product of a sustained and active collaborative process among designer, builder, and client. The work of the Seattle-based architect has been called both raw and refined—disparate characteristics that produce extraordinarily inventive designs inspired by both the industrial structures ubiquitous to his upbringing in the Pacific Northwest and the vibrant craft cultures that are fostered there." --

Making Meaning Out of Mountains Mark C. J. Stoddart 2012 Mountains bear the imprint of human activity. Scars from logging and surface mining sit alongside national parks and ski lodges. Although the environmental effects of extractive industries are well known, skiing is more likely to bring to mind images of luxury, wealth, and health. Drawing on interviews, field observations, and media analysis, Stoddart reveals the multiple, often conflicting meanings attached to skiing by skiers, mass media, First Nations, industry leaders, and environmentalists in British Columbia. Stoddart challenges us to reflect on skiing's negative effects as he exposes how certain groups came to be viewed as the "natural" inhabitants and legitimate managers of mountain environments.

And soon departed a band of men into the mountains during one of the worst winters in recorded history...
