Natural Language Processing with Python Steven Bird 2009-06-12 This book offers a highly accessible introduction to natural language processing, the field that supports a variety of language technologies, from predictive text and email filtering to automatic summarization and translation. With it, you'll learn how to write Python programs that work with large collections of unstructured text. You'll access richly annotated datasets using a comprehensive range of linguistic data structures, and you'll understand the main algorithms for analyzing the content and structure

of written communication. Packed with examples and exercises, Natural Language Processing with Python will help you: Extract information from unstructured text, either to guess the topic or identify "named entities" Analyze linguistic structure in text, including parsing and semantic analysis Access popular linguistic databases, including WordNet and treebanks Integrate techniques drawn from fields as diverse as linguistics and artificial intelligence This book will help you gain practical skills in natural language processing using the Python programming language and the Natural Language Toolkit (NLTK) open source library. If you're interested in developing web applications, analyzing multilingual news sources, or documenting endangered languages - - or if you're simply curious to have a programmer's perspective on how human language works -- you'll find Natural Language Processing with Python both fascinating and immensely useful.

Max and the Tag-Along Moon Floyd Cooper 2013-06-13 Experience the wonder of the moon following you home with a Coretta Scott King Award-winning illustrator! Great for Father's Day and Grandparent's Day! Max loves his grandpa. When they must

say good-bye after a visit, Grandpa promises Max that the moon at Grandpa's house is the same moon that will follow him all the way home. On that swervy-curvy car ride back to his house, Max watches as the moon tags along. But when the sky darkens and the moon disappears behind clouds, he worries that it didn't follow him home after all. Where did the moon go—and what about Grandpa's promise? Floyd Cooper received the Coretta Scott King Award for The Blacker the Berry, three Coretta Scott King Honors for Brown Honey in Broomwheat Tea, Meet Danitra Brown, and I Have Heard of a Land, and an NAACP image award. In Max and the Tag-Along Moon, his lush paintings perfectly capture the wonder of the moon, the love between grandfather and grandson, and that feeling of magic every child experiences when the moon follows him home.. "Coretta Scott King Award-winning Cooper has created a gentle, comforting story that will reassure children that those who love us are always with us." –Booklist "Cooper uses his signature style to illustrate both the landscape--sometimes viewed from the car windows or reflected in the vehicle's mirror--and the expressive faces of his characters. Coupled with the story's lyrical text, this is a lovely mood piece. A quiet, warm look at the bond between grandfather and grandson." –Kirkus Reviews

Vine in 10 Minutes, Sams Teach Yourself Michael Miller 2013-09-04 Launched in January of 2013, Vine is a new mobile app and video-sharing service from Twitter. Vine enables users to shoot short (six-second max) looping videos on their mobile phones

and then share those videos with online friends. Vine videos (called vines) can be viewed from a user's Vine or Twitter feed, shared via Facebook, or embedded in web pages and blogs. This makes Vine like a video version of Instagram, enabling users to "share life in motion" via social networking. This has made Vine enormously popular, especially among the same younger users who made Instagram a hit. Just three months after its release, Vine has become the #1 free app in Apple's U.S. App Store, and is used on 2.66% of all iOS devices – more than any other video app. In addition, 2.8% of Twitter users are also Vine users . These numbers puts Vine's userbase at somewhere between 4 to 6 million users, who upload more than 2,000 new videos each hour. There is no user manual for Vine, nor much in the way of online help files. Anyone wanting to get on the Vine bandwagon can use some help not just learning the basic shooting and sharing features, but also figuring out how to create more sophisticated types of vines. Sams Teach Yourself Vine in 10 Minutes is a one-stop shop for everything associated with Vine, from shooting basic videos to sharing those videos socially to creating more sophisticated and artistic videos. In short, it is a source of inspiration to aspiring Vine users in an easy step-by-step format. It is accompanied by a series of Vine videos, available for viewing from Que's website and YouTube channel, as well as the author Michael Miller's Vine feed. These videos demonstrate the various video techniques discussed in the book to make you an expert!

Learn free tools for creating web pages and tracking your visitors. Attract visitors. Make sure people can find your site through popular search engines like Google. Build a community. Encourage repeat visits with social media. Bring in the cash. Host Google ads, sell Amazon's wares, or push your own products that people can buy via PayPal. Add pizzazz. Include audio, video, interactive menus, and a pinch of JavaScript.

Start with Why Simon Sinek 2011-12-27
The inspirational bestseller that ignited a movement and asked us to find our WHY Discover the book that is captivating millions on TikTok and that served as the basis for one of the most popular TED Talks of all time—with more than 56 million views and counting. Over a decade ago, Simon Sinek started a movement that inspired millions to demand purpose at work, to ask what was the WHY of their organization. Since then, millions have been touched by the power of his ideas, and these ideas remain as relevant and timely as ever. START WITH WHY asks (and

answers) the questions: why are some people and organizations more innovative, more influential, and more profitable than others? Why do some command greater loyalty from customers and employees alike? Even among the successful, why are so few able to repeat their success over and over? People like Martin Luther King Jr., Steve Jobs, and the Wright Brothers had little in common, but they all started with WHY. They realized that people won't truly buy into a product, service, movement, or idea until they understand the WHY behind it. START WITH WHY shows that the leaders who have had the greatest influence in the world all think, act and communicate the same way—and it's the opposite of what everyone else does. Sinek calls this powerful idea The Golden Circle, and it provides a framework upon which organizations can be built, movements can be led, and people can be inspired. And it all starts with WHY.

CLARIN in the Low Countries Jan Odijk 2017-12-28 This book describes the results of activities undertaken to construct the CLARIN research infrastructure in the Low Countries, i.e., in the Netherlands and in Flanders (the Dutch-speaking part of Belgium). CLARIN is a European research infrastructure for humanities and social science researchers that work with natural language data. This book introduces the CLARIN infrastructure, describes various aspects of the technical implementation of the infrastructure, and introduces data, applications and software services created in the Low Countries for a wide variety of humanities disciplines. These enable researchers to accelerate their research activities and to base their conclusions on a much larger and richer empirical base than was possible before, thus providing a basis for carrying out groundbreaking research in which old questions can be investigated in new ways and new questions can be raised and investigated for the first time. Given CLARIN's focus on language data, linguistics and particularly syntax are prominently present. However, other humanities disciplines that work with natural language data such as history, literary studies, religion studies, media studies, political studies, and philosophy are represented as well. The book is a must read for humanities scholars and students who want to understand and

use the potential that the Digital Humanities offer, as well as for computer scientists and developers of research infrastructures, in particular for researchers working on the CLARIN infrastructure in other countries.

Social Network Data Analytics Charu C. Aggarwal 2011-03-18 Social network analysis applications have experienced tremendous advances within the last few years due in part to increasing trends towards users interacting with each other on the internet. Social networks are organized as graphs, and the data on social networks takes on the form of massive streams, which are mined for a variety of purposes. *Social Network Data Analytics* covers an important niche in the social network analytics field. This edited volume, contributed by prominent researchers in this field, presents a wide selection of topics on social network data mining such as Structural Properties of Social Networks, Algorithms for Structural Discovery of Social Networks and Content Analysis in Social Networks. This book is also unique in focussing on the data analytical aspects of social networks in the internet scenario, rather than the traditional sociology-driven emphasis prevalent in the existing books, which do not focus on the unique data-intensive characteristics of online social networks. Emphasis is placed on simplifying the content so that students and practitioners benefit from this book. This book targets advanced level students and researchers concentrating on computer science as a secondary text or reference book. Data mining, database, information security, electronic commerce and machine learning professionals will find this book a valuable asset, as well as

primary associations such as ACM, IEEE and Management Science.

Strategic Planning for Public and Nonprofit Organizations John M. Bryson 2011-07-05 How can leaders use strategic planning to strengthen their public and nonprofit organizations? In this fourth edition of his perennial bestseller *Strategic Planning for Public and Nonprofit Organizations*, Bryson provides the most updated version of his thoughtful strategic planning model and outlines the reasons public and nonprofit organizations must embrace strategic planning to improve their performance. Introduced in the first edition and refined over the past 18 years, the Strategy Change Cycle--a proven planning process used successfully by a large number of nonprofit and public organizations--is the framework used to guide the reader through the strategic planning process. Bryson offers detailed guidance on implementing the process, and specific tools and techniques to make the process work in any organization. In addition, he clarifies the organizational designs through which strategic thought and action will be encouraged and embraced throughout an entire organization. In addition to updated examples, new cases, and additional information on boundaries, distinctive competencies, Actor-Network theory, Bryson will create an instructor's manual with sample syllabi, PowerPoint teaching slides, and additional cases.
