Amid all the changes to the Web in the past decade, and all the hype about Web 2.0 and various "rich" interactive technologies, the basic problems of creating a good web navigation system remain. This book: Provides the foundations of web navigation and offers a framework for navigation design Paints a broad picture of web navigation and basic human information behavior Demonstrates how navigation reflects brand and affects site credibility Helps you understand the problem you're trying to solve before you set out to design Thoroughly reviews the mechanisms and different types of navigation Explores "information scent" and "information shape" Explains "persuasive" architecture and other design concepts Covers special contexts, such as navigation design for web applications Includes an entire chapter on tagging While Designing Web Navigation focuses on creating navigation systems for large, information-rich sites serving a business purpose, the principles and techniques in the book also apply to small sites. Handbook on E-marketing for Tourism Destinations World Tourism Organization 2008 This handbook is the fourth in a series of joint publications by the European Travel Commission (ETC) and the World Tourism Organization (UNWTO) in the area of methodological manuals. The first three manuals were "Evaluating NTO Marketing Activities" (ISBN 9789284406364); "Tourism Market Segmentation" (ISBN 9789284412075) and "Tourism Forecasting Methodologies" (ISBN 9789284412389). The internet and other new technologies have changed the tourism industry in an unprecedented way, and keeping pace has become challenging. Online information is now one of the primary influences on consumer decisions in nearly all major markets. For example, 41 per cent of tourists arriving in Spain in 2007 had booked through the internet, and in the United States the number of trips bought online exceeded those purchased offline. Such changes are impacting and influencing the way destinations and companies manage and market themselves.

The Routledge Handbook of Tourism Marketing Scott McCabe 2014-01-03 Tourism has often been described as being about 'selling dreams', tourist experiences being conceptualized as purely a marketing confection, a socially constructed need. However, the reality is that travel for leisure, business, meetings, sports or visiting loved ones has grown to be a very real sector of the global economy, requiring sophisticated business and marketing practices. The Routledge Handbook of Tourism Marketing explores and critically evaluates the current debates and controversies inherent to the theoretical, methodological and practical processes of marketing within this complex and multi-sector industry. It brings together leading specialists from range of disciplinary backgrounds and geographical regions to provide reflection and empirical research on this complex relationship. The Handbook is divided in to nine inter-related sections: Part 1 deals with shifts in the context of marketing practice and our understanding of what constitutes value for tourists; Part 2 explores macromarketing and tourism; Part 3 deals with strategic issues; Part 4 addresses recent advances in research; Part 5 focuses on developments in tourist consumer behaviour; Part 6 looks at micromarketing; Part 7 moves on to destination marketing and branding issues; Part 8 looks at the influence of technological change on tourism marketing; and Part 9 explores future directions. This timely book offers

the reader a comprehensive synthesis of this sub-discipline, conveying the latest thinking and research. It will provide an invaluable resource for all those with an interest in tourism and marketing, encouraging dialogue across disciplinary boundaries and areas of study. This is essential reading for Tourism students, researchers and academics as well as those of Marketing, Business, Events Management and Hospitality Management.
