**New Perspectives on Sport Volunteerism** Berit Skirstad 2017-10-02 The book highlights 'new perspectives' on volunteerism in sport, covering frameworks, methods, context and variables on several levels from community sport clubs to international events. In analysing the processes of control within voluntary sport clubs, a new theoretical framework – critical realism (CR) – challenges how we think about theory and how scientific inquiry should proceed. Further themes raised are: Should sports clubs be viewed as a crossing between a traditional volunteer culture dominated by collective solidarity, and a modern volunteer culture focused on the individual benefits? Are former athletes a new group of possible volunteers? Can personal narratives of experiences of being a volunteer in a big international event provide us with new insight that has not previously been considered? Identity is suggested as a motive for understanding volunteers at sporting events. Two new theoretical models are presented, one on the

development of volunteer commitment and the other on a framework that incorporates both individual- and institutional-level variables. All chapters have recommendations for future research. The testing of these theories and influencing factors will provide new directions in the research of sport volunteerism. This book was originally published as a special issue of European Sport Management Quarterly.

My Colour-Coded Life Megan Jackson Hall 2020-05-07 *My Colour-Coded Life* is an autobiography of one brave woman's life weighed down with mental illness. Using a pseudonym and changed names for legal reasons, the author shares her fascinating experiences. The story begins with her distrust of her husband in 2000, and in 2005, her diagnosis of schizoaffective disorder. Along the way, we learn of her battle with colours and the messages she took from them—and also from food, TV, radio, music, newspapers, her guitar music, missing things, other people's clothes, and even products on the shelves. Once trust was gained in Music, she grips onto inspirational lyrics to pull her out of the quagmire she found herself sinking into. In searing honesty, she

shares her triggers and offers insight on what she knows about her relapses. In the beginning, she feared colours, but over time they empowered her, made her feel blessed and able to take control of her life. *My Colour-Coded Life* offers readers the chance to walk in the shoes of someone who's suffered greatly. Ideally, it will educate neurotypical readers and destigmatize mental illness along the way.

Making Meaning Out of Mountains Mark C.J. Stoddart 2012-05-01 Mountains bear the imprint of human activity. Scars from logging and surface mining sit alongside national parks and ski lodges. Although the environmental effects of extractive industries are well known, skiing is more likely to bring to mind images of luxury, wealth, and health. Drawing on interviews, field observations, and media analysis, Stoddart reveals the multiple, often conflicting meanings attached to skiing by skiers, mass media, First Nations, industry leaders, and environmentalists in British Columbia. Stoddart challenges us to reflect on skiing's negative effects as he exposes how certain groups came to be viewed as the "natural" inhabitants and legitimate managers of mountain environments.

**Winter Tourism** Ulrike Pröbstl-Haider 2019-10-03 Winter tourism has seen increased levels of investment in recent times, in an effort to reduce economic risk, address environmental concerns and adapt to the effects of global warming. New ski destinations are developing and merging with traditional ones to increase spatial distribution, while many established leading resorts are adapting their management models. Climate change adaptation processes are supported by the reduction of CO2 emissions and energy consumption in ski resorts. Current planning challenges include the increasing importance of scenic beauty, nature and sustainable development, as well as snow reliability, snow management and safety issues.

**A Whistler Bear Story** Sylvia Dolson 2009-12-01 World-renown Whistler is home to some of the most awe-inspiring animals on earth: black bears. In A WHISTLER BEAR STORY, you'll meet the real black bears of Whistler -- Jeanie, Katie, Marissa, Fitz and Slip among others. They den near favorite ski runs, graze in open meadows under chair lifts, munch on golf course grass, and devour berries alongside mountain bike trails. And sometimes, to their misfortune, they come into town, raid garbage bins, eat berries in people's yards, and even break into homes and restaurants looking for food. Find out what it's like to live in a town where bears roam the forests nearby, and learn what the town is doing to minimize human-bear conflict and preserve our fragile coexistence.
