a new identity. He now goes by the name Greg Myers, and he claims to know of a Florida judge who has stolen more money than all other crooked judges combined. And not just crooked judges in Florida. All judges, from all states, and throughout U.S. history. What the source of the ill-gotten gains? It seems the judge was secretly involved with the construction of a large casino on Native American land. The Coast Mafia financed the casino and is now helping itself to a sizable skim of each month's cash. The judge is getting a cut and looking the other way. It's a sweet deal: Everyone is making money. But now Greg wants to put a stop to it. His only client is a person who knows the truth and wants to blow the whistle and collect millions under Florida law. Greg files a complaint with the Board on Judicial Conduct, and the case is assigned to Lacy Stoltz, who immediately suspects that this one could be dangerous. Dangerous is one thing. Deadly is something else.

Sarah Robert Gottlieb
2010-09-21 Everything about Sarah Bernhardt is fascinating, from her obscure birth to her glorious career--redefining the very nature of her art--to her amazing (and highly public) romantic life, to her indomitable spirit. Well into her seventies, after the amputation of her leg, she was performing under bombardment for soldiers during World War I and toured America for the ninth time. Though the Bernhardt literature is vast, this is the first English-language biography to appear in decades, tracking the trajectory through which an illegitimate--and scandalous--daughter of a Jewish courtesan transformed herself into the most famous actress who ever lived, and into a national icon, a symbol of France.--From publisher description.

52 Best Day Trips from

Vancouver Jack Christie

2015-04-20 The best views, biking, beaches, and outings for kids--they're all here in an updated edition of the Lower Mainland's favourite guidebook for day-trippers, described in the clear, upbeat, observant prose that is Jack's trademark. From Delta to Whistler, West Vancouver to Harrison Hot Springs, detailed directions (including driving distances and times, as well as special information about wheelchair access) help you find your way and enjoy the sights en route. This fourth edition includes two brand-new chapters: Callaghan Valley in the Whistler mountains, and 1,001 Steps Park on Surrey's beaches.

Electoral Realignments

David R. Mayhew 2008-10-01
The study of electoral realignments is one of the most influential and intellectually stimulating enterprises undertaken by American

political scientists.

Realignment theory has been seen as a science able to predict changes, and generations of students, journalists, pundits, and political scientists have been trained to be on the lookout for "signs" of new electoral realignments. Now a major political scientist argues that the essential claims of realignment theory are wrong—that American elections, parties, and policymaking are not (and never were) reconfigured according to the realignment calendar. David Mayhew examines fifteen key empirical claims of realignment theory in detail and shows us why each in turn does not hold up under scrutiny. It is time, he insists, to open the field to new ideas. We might, for example, adopt a more nominalistic, skeptical way of thinking about American elections that highlights contingency, short-term election strategies, and valence issues. Or we might examine such broad topics as bellicosity in early

history, or racial questions in much of our electoral history. But we must move on from an old orthodoxy and failed model of illumination.

Pacific Rural Press 1913

Historical Painting Techniques, Materials, and Studio Practice Arie Wallert 1995-08-24 Bridging the fields of conservation, art history, and museum curating, this volume contains the principal papers from an international symposium titled "Historical Painting Techniques, Materials, and Studio Practice" at the University of Leiden in Amsterdam, Netherlands, from June 26 to 29, 1995. The symposium—designed for art historians, conservators, conservation scientists, and museum curators worldwide—was organized by the Department of Art History at the University of Leiden and the Art History Department of the Central Research Laboratory for Objects of Art and Science in Amsterdam. Twenty-five contributors

representing museums and conservation institutions throughout the world provide recent research on historical painting techniques, including wall painting and polychrome sculpture. Topics cover the latest art historical research and scientific analyses of original techniques and materials, as well as historical sources, such as medieval treatises and descriptions of painting techniques in historical literature. Chapters include the painting methods of Rembrandt and Vermeer, Dutch 17th-century landscape painting, wall paintings in English churches, Chinese paintings on paper and canvas, and Tibetan thangkas. Color plates and black-and-white photographs illustrate works from the Middle Ages to the 20th century.

The American Farmer in the Eighteenth Century Richard L. Bushman 2018-05-22 An illuminating study of America's agricultural society during the Colonial, Revolutionary, and Founding eras In the eighteenth century, three-quarters of Americans made their living from farms. This authoritative history explores the lives, cultures, and societies of America's farmers from colonial times through the founding of the nation. Noted historian Richard Bushman explains how all farmers sought to provision themselves while still actively engaged in trade.

subsistence and commerce vital to farm economies of all sizes. The book describes the tragic effects on the native population of farmers' efforts to provide farms for their children and examines how climate created the divide between the free North and the slave South. Bushman also traces midcentury rural violence back to the century's population explosion. An engaging work of historical scholarship, the book draws on a wealth of diaries, letters, and other writings—including the farm papers of Thomas Jefferson and George Washington—to open a window on the men, women, and children who worked the land in early America.

Nexus New York Deborah Cullen 2009 An examination of the pioneering Caribbean and Latin American artists who resided in New York prior to WWII and shaped the American avant-garde Between 1900 and 1942, New York City was the site of extraordinary creative exchange where artists could

share ideas in a global context. The swiftly changing urban landscape before and between the World Wars inspired the erosion of artistic boundaries and fostered a new climate of modernist experimentation. **Nexus New York** focuses on key artists from the Caribbean and Latin America who entered into dynamic cultural and social dialogues with the American-based avant-garde and participated in the development of a new modern discourse. Featuring both celebrated and little-known figures of this period, including Carlos Enríquez, Alice Neel, Marius de Zayas, Francis Picabia, Joaquín Torres-García, José Clemente Orozco, Matta, and Robert Motherwell, contributing authors also discuss the specific environments in which they flourished, including the Art Students League, the Siqueiros Experimental Workshop, and the New School for Social Research. A fascinating look at 20th-century modernism, this book provides the first view of the important end

between artists of the Americas.

Shelter Mountain Robyn Carr
2013-01-29 Welcome back to Virgin River with the books that started it all... Rediscover the romances and friendships of this small California town from #1 New York Times bestselling author Robyn Carr. Now a Netflix Original Series! For the second time in a year, a woman arrives in the small town of Virgin River trying to escape her past. John "Preacher" Middleton is about to close the bar when a young woman and her three-year-old son come in out of the wet October night. A marine who has seen his share of pain, Preacher knows a crisis when he sees one—the woman is covered in bruises. He wants to protect them, and to punish whoever did this, but he knows immediately that this is more than just instinct. Paige Lassiter has stirred up emotions in this gentle giant of a man—emotions that he has never allowed himself to feel. Then Paige's ex-husband turns

up in Virgin River. And if there's one thing the marines' motto of Semper Fi—always faithful—has taught Preacher, it's that some things are worth fighting for. Previously published. evolved during an era of war and how it in turn shaped the revolutionary process. The book is based on evidence gathered from archives and interviews with villagers and rural officials.

Mountains and Plains Dennis H. Knight 2014-01-01 Many changessome discouraging, others hopefulhave occurred in the Rocky Mountain region since the first edition of this widely acclaimed book was published. Wildlife habitat has become more fragmented, once-abundant sage grouse are now scarce, and forest fires occur more frequently. At the same time, wolves have been successfully reintroduced, and new approaches to conservation have been adopted. For this updated and expanded Second Edition, the authors provide a highly readable synthesis of research undertaken in the past two decades and address two important questions: How can ecosystems be used so that future generations benefit from them as we have? How can we

anticipate and adapt to climate changes while conserving biological diversity?

Facing Beauty Aileen Ribeiro 2011 This wide-ranging survey, spanning four centuries, illuminates shifting perceptions of female beauty through works of art and the evolution of cosmetics

Endless Forms Fitzwilliam Museum 2009 A gorgeously illustrated book that is the first to explore the impact of Darwin's ideas about man and nature on 19th-century visual arts Charles Darwin's revolutionary theories of evolution and natural selection have not only had a profound influence on the fields of biology and natural history, but also provided fertile territory for the creative imagination. This lavishly illustrated book accompanies an exhibition organized by the Fitzwilliam Museum, University of Cambridge, in association with the Yale Center for British Art, that will coincide with the global celebration of ~~the~~

bicentenary of Darwin's birth and the 150th anniversary of the publication of *On the Origin of Species by Means of Natural Selection* (1859). The essays in this exceptionally wide-ranging book examine both the profound impact that Darwin's ideas had on European and American artists and the ways in which his theories were influenced by the visual traditions he inherited. In works by artists as diverse as Church, Landseer, Liljefors, Heade, Redon, Cézanne, Lear, Tissot, Rossetti, and Monet, from imaginative projections of prehistory to troubled evocations of a life dominated by the struggle for existence, Darwin's sense of the interplay of all living things and his response to the beauties of the natural world proved inspirational.

Prairie Farmer 1914

The Search for Immortality

James C. S. Lin 2012 During the last two centuries BC, the Western Han dynasty of China forged the first stable empire

covering all of China and presided over a golden age that shaped much of subsequent Chinese art and culture. From family values to the structure of the civil service, Han thinking and philosophy continue to pervade Chinese society up to the present day - indeed, the majority of Chinese people consider themselves 'Han Chinese'. In the search for immortality, the Han imperial family left an artistic legacy of spectacular beauty and power. The finest of these treasures to have survived - including exquisite jades, silver and goldwork, bronzes and ceramics - have been found in the tombs of the Han imperial family and of a revival 'emperor' of Nanyue.

A Farmer's Guide to Farmers' Markets Anna Helmer 2018-02-07 The concept of buying and selling food at market is not a new one, but in our western food culture characterized by convenience, low prices, and year-round availability, many assume that farmers' markets are hopelessly old-fashioned and over-priced. It's so easy to get ready-to-eat and cheap food that the idea of lining-up in the rain for expensive potatoes seems far-fetched. Yet here we are. When we attended the early Vancouver farmers'

markets in the mid '90's, we were skeptical that people would embrace this sort of shopping experience, and indeed, these were not the bustling scenes of commerce that they are today. There was something magical, however, in each transaction. The customers seemed happy to be there: impressed with the quality of the produce, appreciative of the effort to produce it, and willing to pay. We were thrilled to be there too, able to get a reasonable price for the crop, selling to people who seemed to be so encouraging. We were inspired to carry on, and the customers kept coming. Things have gone well, since then. A well-run, well-attended farmers' market is an outstanding retail environment. The farmer charges enough to cover costs and earn some profit, and the consumer is offered top quality produce and exceptionally motivated customer service. Both parties come back for more, week after week and year after year. Farmers' markets are becoming

institution of a food system that promises to make quality of product and service top priorities, rather than price and ...well...price. It's not all White Rose and Russets though, as we say in the potato business: farmers' markets present challenges for all involved. Customers pay a little more, park further away and brave all weathers. Market management use non-profit budgets to run multi-million-dollar businesses. Farmers exert a lot of energy to grow and arrive with top quality product and must become adept marketers. Customers who are branching out from their store shopping experience have a lot of good choices available to them these days. It's a safe bet that they will at least try going to a farmers' market, because they are certainly symbolic of the clean and green food movement. If that doesn't grab them, they can try a home delivery model, several alternative brick and mortars, and even certain big box retailers, so many of whom are

bringing in organic and local. That's a lot of competition. The viability and vitality of farmers' markets must be queried. I have no idea what the future of farmers' markets is. They have been a boon to small farms like mine that wouldn't have been able to make a living relying on wholesale pricing, and I know a lot of shoppers who would not dream of returning to the grocery store for their produce. I also know that only a small fraction of the population has experienced farmers' markets, although they could be convinced, and therein lies the golden opportunity. The growth of markets could be guaranteed forever if every first-time visitor experienced a good dose of appreciation right off the bat. The quality of product at farmers' markets is often exceptional and when the farmer can convey appreciation for the business, we have the makings of a repeat customer. It becomes a worthwhile shopping experience, and they will probably be back for more. The farm vendor has a clear job: get really good at

doing markets. Put as much work into selling the product as you do farming it. Become an expert marketer and practice excellent customer service. Make the customers want to come back for more. That's how farmers' markets can not only compete but continue to be the flagship institution of the modern food system. That's what this book is about: helping the farm vendor make the most of being at market.

Ham House Christopher Rowell 2013 Built in 1610 during the reign of James I and remodeled in 1637-39 by the future first Earl of Dysart, Ham House and its gardens have endured through centuries of English history while remaining representative of the styles and culture of the original inhabitants. It is one of the few places where Caroline décor—as developed by British architect Inigo Jones and familiar to Peter Paul Rubens and Anthony van Dyck—can still be appreciated. To mark the 400th anniversary of one of the most famous houses in

Europe, eighteen internationally recognized scholars join National Trust curators in documenting the history of Ham House and its collections. The new discoveries, reattributions, and revelations of the contributors are accompanied by specially commissioned photography of the house and its contents. An appendix includes complete transcriptions of house inventories for the 17th, 18th, and 19th centuries, published here for the first time.

Paul Mellon's Legacy John Baskett 2007-01-01 Paul Mellon (1907--1999) was an unparalleled collector of British art. His collection, now at Yale in the museum and study center he founded to house it, rivals those in Britain's national museums and is unquestionably the most comprehensive representation of British art held outside of the United Kingdom. This book and the exhibition that it accompanies celebrate the centenary of his birth. Five introductory essays examine Mellon's extraordinary collecting activity, as well as his role in creating both the Yale Center for British Art and the Paul Mellon Centre for Studies in British Art in London as gifts to his alma mater (Yale 1929). A lavishly illustrated catalogue section showcases

148 of the most exquisite and important paintings, watercolors, drawings, prints, sculpture, rare books, and manuscript material in the Yale Center's collection, including major works by Thomas Gainsborough, Joshua Reynolds, George Stubbs, John Constable, and J. M. W. Turner.

Und wessen Entdeckungsdrang damit noch nicht befriedigt ist, wird - über die Landesgrenzen hinweg - in die bizarre Gletscherwelt Alaskas geleitet.

Only in Whistler Stephen Vogler 2009 For several weeks in February, the eyes of the world will be on Whistler, BC, as it hosts the 2010 Olympic Winter Games and the appetite for a story to go with the place will be extreme. Stephen Vogler has that story, and in this book he tells it fully for the first time. Vogler is one of those rare Whistlerites who actually grew up in Whistler and he has for some years been running a one-man crusade as writer, broadcaster and author of books to prove his hometown is not only a bona fide

community, but a uniquely interesting one. Whistler begins in the days when the town had a mere 500 year-round residents who referred to weekend visitors as "turkeys" or "gorbies." His parents were old-school European alpinists who had given up a comfortable life in Vancouver so they could teach their children how to yodel and schuss in an appropriate setting. People like them, with names like Ples and Wilhelmsen, had developed the ski hill in the 1960s and together formed one of Whistler's founding cultures. The other founding culture was a swarming, partying mass of snow-hippies who lived rent-free in rough squatters' shacks and liked marijuana as much as they didn't like wearing clothes. Their "high" spirits melded with the soberer tradition of the transplanted Tyroleans to produce a hybrid "only in Whistler" character that is equally devoted to serious skiing and unserious living. It was no accident that the first Whistler

Olympic gold medal also tested positive for cannabis, and successfully defended himself by arguing that just breathing the air in his hometown was enough to put him over the limit. If anybody doubts that story, they won't after reading *Only in Whistler: Tales of a Mountain Town*.

Best Weekend Getaways

from Vancouver Jack Christie
2009-05-01 In this detailed guide, Jack Christie shares his favorite two- and three-day trips in the Vancouver area. It covers everything from rugged outdoor activities in the Gulf Islands to bicycle tours in Victoria, wine tours in the Okanagan, and backroad exploring in Whistler, ensuring that visitors can find as much (or as little) adventure as they like. There are getaways for every taste and budget, and none are more than a five-hour drive from Vancouver, including ferry travel where necessary. Each of the 28 entries includes complete driving directions with tips on sights to see along the way, as

well as activities, attractions, accommodations, and dining options for the destination. In addition to photos, each chapter features sidebars and pull-out sections that offer specific tips for maximizing one's time. Indexes of the destinations and activities make planning the perfect weekend getaway a breeze.

classical music. In this fascinating new biography, the breadth of Bernstein's musical composition is explored, through the spectacular range of music he composed—from West Side Story to Kaddish to A Quiet Place and beyond—and through his intensely public role as an internationally celebrated conductor. For the first time, the composer's life and work receive a fully integrated analysis, offering a comprehensive appreciation of a multi-faceted musician who continued to grow as an artist well into his final days.

The Pacific Rural Press and California Farmer 1913

Whistler to Cassatt Timothy J. Standring 2021-11-16 A revelatory look at an underexplored chapter of American art, which took place not on American soil but in France In the late nineteenth and early twentieth centuries, American artists flocked to France in search of instruction, critical acclaim, and patronage. Some, including James McNeill

Whistler, John Singer Sargent, and Mary Cassatt, became highly regarded in the French press, advancing their careers on both sides of the Atlantic. Others, notably William Merritt Chase, John Twachtman, Childe Hassam, and Thomas Wilmer Dewing--part of the association known as The Ten--found success working in the style of the French Impressionists, while Henry Ossawa Tanner, Cecilia Beaux, and Elizabeth Jane Gardner focused on genre and history subjects. This richly illustrated volume offers a sophisticated examination of cultural and aesthetic exchange as it highlights many figures, including artists of color and women, who were left out of previous histories. Celebrated scholars from both American and French institutions detail the complex history and diverse styles of these expatriate artists--styles ranging from conservative academic modes to Tonalism--and provide original perspectives on this fertile period of creativity.

our understanding of what constitutes American art.

On Color David Scott Kastan
2018-01-01 Our lives are saturated by color. We live in a world of vivid colors, and color marks our psychological and social existence. But for all color's inescapability, we don't know much about it. Now authors David Scott Kastan and Stephen Farthing offer a fresh and imaginative exploration of one of the most intriguing and least understood aspects of everyday experience. Kastan and Farthing, a scholar and a painter, respectively, investigate color from numerous perspectives: literary, historical, cultural, anthropological, philosophical, art historical, political, and scientific. In ten lively and wide-ranging chapters, each devoted to a different color, they examine the various ways colors have shaped and continue to shape our social and moral imaginations. Each individual color becomes the focal point for a consideration of one of the extraordinary

ways in which color appears and matters in our lives. Beautifully produced in full color, this book is a remarkably smart, entertaining, and fascinating guide to this elusive topic.

The Jewel House Deborah E. Harkness 2007-10-24 The #1 New York Times–bestselling author of *A Discovery of Witchese* examines the real-life history of the scientific community of Elizabethan London. Travel to the streets, shops, back alleys, and gardens of Elizabethan London, where a boisterous and diverse group of men and women shared a keen interest in the study of nature. These assorted merchants, gardeners, barber-surgeons, midwives, instrument makers, mathematics teachers, engineers, alchemists, and other experimenters formed a patchwork scientific community whose practices set the stage for the Scientific Revolution. While Francis Bacon has been widely regarded as the father of modern science, ~~Downloaded from~~

London contemporaries also deserve a share in this distinction. It was their collaborative, yet often contentious, ethos that helped to develop the ideals of modern scientific research. The book examines six particularly fascinating episodes of scientific inquiry and dispute in sixteenth-century London, bringing to life the individuals involved and the challenges they faced. These men and women experimented and invented, argued and competed, waged wars in the press, and struggled to understand the complexities of the natural world. Together their stories illuminate the

blind alleys and surprising twists and turns taken as medieval philosophy gave way to the empirical, experimental culture that became a hallmark of the Scientific Revolution. “Elegant and erudite.”

—Anthony Grafton, American Scientist “A truly wonderful book, deeply researched, full of original material, and exhilarating to read.” —John Carey, Sunday Times “Widely accessible.” —Ian Archer, Oxford University “Vivid, compelling, and panoramic, this revelatory work will force us to revise everything we thought we knew about Renaissance science.” —Adrian Johns, author of *The Nature Book*
