BRM V16 - Karl Ludvigsen 2007-02

There was a vast difference between the BRM and any other car I'd yet driven. When I opened the throttle, even at high speeds in top gear, the whole thing shuddered with a frightening surge of power. It could spin its wheels effortlessly at speeds equal to many other cars' maximum. It was doing 187 on the straight at Monza, which was too quick for a car that didn't handle. If you let the revs drop much below 9000 the car just wouldn't go at all." Sir Stirling Moss.

Lotus Europa - Colin Chapman's mid-engined masterpiece -

Matthew Vale 2022-04-13

The Lotus Europa was Colin Chapman and Lotus's first mid-engined road car, and was produced from 1966 through to 1975. Originally designed to slot into the Lotus range below the Elan as a low cost replacement for the Lotus 7, the Europa eventually sat alongside the Elan and Plus 2 as a comparable sports car in its own right. Starting with the design philosophy behind the development of the Europa, this book provides detailed technical descriptions of all the major versions of the model, starting with the Renault-powered Series 1 through to the Lotus Twin Cam powered Special. It looks at the cars on the road, and the racing Type 47 derived from the road cars which competed in the small capacity Group 6 class, as well as featuring in historic racing today. With owners' impressions and interviews with ex-Lotus employees, the book provides a valuable insight into owning, running, and racing these iconic cars.

How to Build Max-Performance Mitsubishi 4G63t Engines - Robert Bowen 2008-12

The photos in this edition are black and white. Mitsubishi's 4G63t engine is among the most powerful engines ever in the sport-compact world. It's not uncommon to find one of these four-cylinder, iron-block, aluminum-

headed, 2-liter turbocharged monsters making more than 1,000 horsepower with the right modifications and tuning - well above the 200-300 hp produced in the factory-made engines. Bolted into such cars as the Mitsubishi Lancer Evolution, Eclipse, and Galant, and the Eagle Talon and Plymouth Laser, the 4G63t has more than a cult following among sport-compact enthusiasts, who know and respect this engine's immense performance potential at the track or on the street. Up until now, in-depth performance information on the 4G63t has been hard to find. For this book, author Robert Bowen went straight to the source, Robert Garcia of Road/Race Engineering in Santa Fe Springs, California. RRE is the most well-known and respected Mitsubishi turbo performance shop in the United States, and Garcia is its in-house engine builder. Mitsubishi enthusiasts will benefit from Garcia's expertise and be able to build better, stronger engines than ever before. "How to Build Max-Performance Mitsubishi 4G63t Engines" covers every system and component of the engine, including the turbocharger system and engine management. More than just a collection of tips and tricks, this book includes a complete history of the engine and its evolution, an identification guide, and advice for choosing engine components and other parts. Profiles of successful built-up engines show the reader examples of what works, and the book includes helpful guidance for choosing your own engine building path.
