**The Letters of the Younger Pliny** - Gaius Plinius Caecilius Secundus 1969

AD 61-113) was also a prolific letter-writer, who numbered among his correspondents such eminent figures as Tacitus, Suetonius and the Emperor Trajan, as well as a wide circle of friends and family. **Righteous Porkchop** - Nicolette Hahn Niman 2010-10-19

Asked to head up Robert F. Kennedy Jr.'s environmental organization's "hog campaign," Nicolette Hahn Niman embarked upon a fascinating odyssey through the inner workings of the "factory farm" industry. What she discovered transformed her into an intrepid environmental lawyer determined to lock horns with the big business farming establishment. She even, unexpectedly, found love along the way. A searing account of an industry gone awry and one woman's passionate fight to remedy it, *Righteous Porkchop* chronicles Niman's investigation and her determination to organize a national reform movement to fight the shocking practices of industrial animal operations. She offers necessary alternatives, showing how livestock farming can be done in a better way—and she details both why and how to choose meat, poultry, dairy, eggs, and fish from traditionally farmed sources.

**Menander: The Bad Tempered Man** - Menander (of Athens.) 1995

Though in later antiquity the social comedies of Menander ranked second in popularity only to Homer, his plays were for centuries thought to be irretrievably lost. Only in this century have instances begun to re-emerge from the sands of Egypt, and it was not until 1958 that a complete play, *Dyskolos* or *The Bad-Tempered Man*, came to light. With this we can now gauge in full the skill that Menander brought to his works, even in the early phase of his career. In preparing this edition, the author aims to make accessible to readers some of the consummate sophistication in dramatic technique and use of language that once produced the question, "Menander and Life, which of you imitated the other?" Greek text with facing translation, commentary and notes.

**The Rise of Rome** - Plutarch 2017-07-25

The biographies collected in this volume bring together Plutarch's Lives of those great men who established the city of Rome and consolidated its supremacy, and his Comparisons with their notable Greek counterparts. Here he pairs Romulus, mythical founder of Rome, with Theseus, who brought Athens to power, and compares the admirable Numa and Lycurgus for bringing order to their communities, while Titus Flamininus and Philopoemen are portrayed as champions of freedom. As well as providing an illuminating picture of the first century AD,

Plutarch depicts complex and nuanced heroes who display the essential virtues of Greek civilization - courage, patriotism, justice, intelligence and reason - that contributed to the rise of Rome. These new and revised translations by W. Jeffrey Tatum and Ian Scott-Kilvert capture Plutarch's elegant prose and narrative flair. This edition also includes a general introduction, individual introductions to each of the Lives and Comparisons, further reading and notes. The Rise of Rome is the penultimate title in Penguin Classics' complete revised Plutarch in six volumes. Other titles include Rome In Crisis, On Sparta, Fall of the Roman Republic, The Age of Alexander and The Rise and Fall of Athens (forthcoming 2014).

The first part of the book introduces new constructions accompanied by exercises including the translation of sentences from English to Greek and reading passages (which in the opening chapters are lightly adapted). The next sections provide translation and comprehension passages at both AS and A Level standard, including verse unseens, scansion, and a list of 300 common poetic words (new to this edition). Next come longer unadapted extracts from a range of authors. Finally there is a reference section including a summary of all constructions, a comprehensive grammar, various appendices and a vocabulary of about 1,200 Greek words.

**Foundations of Structural Geology** - R. Graham Park 1997

Since the first edition was published in 1983, this highly-regarded introductory textbook has been used by many generations of students worldwide. It is specifically tailored to the requirements of first or second year geology undergraduates. The third edition has been extensively revised and updated to include many new sections and over 50 new or redrawn illustrations. There are now over 220 illustrations, many incorporating a second colour to highlight essential features. The format has been changed to enhance the visual

attractiveness of the book. The tripartite organization of the first and second editions has been modified by combining the purely descriptive or factual aspects of fault and fold structure in the earlier chapters with a simple treatment of mechanisms, leaving the more geometrically complex treatment until after the relevant sections on stress and strain, as before. Some subjects are introduced for the first time, e.g. inversion and orogen collapse, and others have been extensively modified, e.g. the chapter on gravity controlled structures now emphasises modern work on salt tectonics. The last third of the book is devoted to the wider context of geological structures and how they relate to plate tectonics. The final two chapters have been considerably expanded and give examples of various types of geological structures in their plate tectonic settings in both modern and

ancient orogenic belts.
