Islamic Finance - Nafis Alam 2017-12-18

This book provides a comprehensive and practical guide to Islamic finance. It covers a broad range of important topics including Islamic banking, capital markets, Takaful, wealth management, Fintech in Islamic finance, compliance and governance issues. It begins by introducing Islamic banking, covering its objectives, principles and evolution, before moving on to discuss the religious foundations of Islamic finance. The prohibition of Riba and Gharar and Islamic contracts are explored, before Islamic deposits, and financing are discussed in practice. A comparative analysis is provided between Islamic banking products and services in a range of countries throughout the

world. Information technology including fintech, payment and settlement networks, opportunities and challenges are also addressed. Corporate governance, Islamic capital markets, and Islamic insurance (Takaful) are all explored, before concluding with a chapter on wealth management and Islamic investment funds. It features case studies based on the authors' own experiences consulting with Islamic financial institutions. Ideal for those looking to improve their understanding of practical Islamic financing models, contracts, product structures and product features, this book will appeal to both students and practitioners in Islamic finance and banking, those based in Islamic financial institutions, and those based in conventional financial institutions who may be looking to enter the Islamic financial market.

Jesus and the Samurai - Michael Zomber
2009-11-05

By 250 AD, Christianity had spread throughout India and China. Known as the Shining Religion or the Luminous Teaching, it drew adherents from Buddhism and Hinduism who were seeking a faith that taught the possibility of achieving a

society founded on love and compassion for their fellow man. The new doctrine reached the island nation of Japan where it was so well received that Christianity threatened to supplant Buddhism as the dominant religion. By the close of the 16th century Japanese Christians numbered in the millions. Fifty years later Christianity was officially proscribed and Christians faced execution for openly practicing their faith. Jesus and the Samurai tells their fascinating story with facts drawn from ancient and modern sources.

Time and Tide - Lenalee N. Robinson
2022-07-25

Lucy Nash has just finished up her sophomore year of high school and is anticipating an uneventful summer at her rural Georgia home. . . that is, until a weird twist of fate and physics takes her on a trip back through time to the year 1975 with Cameron Hall, a boy her age whose own time is thirty years into her future. Cameron is hoping to stop a series of child

disappearances, one of which deeply affected his family, and ends up teaming up with his accidental "passenger" to solve the crime. But despite their access to resources from the future, can two teenagers resolve a mystery that has remained a cold case for over sixty years. . . and what impact will their presence in the past have on their own lives - and their own futures?

Shariah Investment Agreement - Syed Adam Alhabshi 2021-02-08

Risk-sharing investment is currently the buzz word in Islamic finance. However, there is an incongruence in applying multilayered and opaque Tjjarah contracts for investment purposes. This has contributed to the divergence between Shariah and Common Law and caused tremendous problems and systemic legal risks to Islamic finance. The authors of Shariah Investment Agreement introduce a legal tool in the form of a Shariah Investment Agreement carefully drafted to ensure that it is Shariah-compliant and can be applied in Common Law

jurisdictions as well, so as to allow for the execution of risk-sharing investment in Islamic finance. It details the building blocks and key considerations that must be noted when drafting such agreements so the investor and investee will know what to expect when entering into such a contract. Proper implementation of the Shariah Investment Agreement will pave a clear route to a harmonious convergence between Shariah and Common Law and lead to Islamic finance developing further to become a stronger, unstoppable force in the finance industry.

Transforming Urban Transport - Diane E. Davis
2018-11

Transforming Urban Transport brings into focus the origins and implementation pathways of significant urban transport innovations that have recently been adopted in major, democratically governed world cities that are seeking to advance sustainability aims. It documents how proponents of new transportation initiatives confronted a range of administrative, environmental, fiscal, and political obstacles by

using a range of leadership skills, technical resources, and negotiation capacities to move a good idea from the drawing board to implementation. The book's eight case studies focus on cities of great interest across the globe--Los Angeles, Mexico City, New York, Paris, San Francisco, Seoul, Stockholm, and Vienna--many of which are known for significant mayor leadership and efforts to rescale power from the nation to the city. The cases highlight innovations likely to be of interest to transport policy makers from all corners, such as strengthening public transportation services, vehicle and traffic management measures, repurposing roads and other urban spaces away from their initial function as vehicle travel corridors, and turning sidewalks and city streets into more pedestrian-friendly places for walking, cycling, and leisure. Aside from their transformative impacts in transportation terms, many of the policy innovations examined here have altered planning institutions, public-private

sector relations, civil society commitments, and governance mandates in the course of implementation. In bringing these cases to the fore, *Transforming Urban Transport* advances understanding of the conditions under which policy interventions can expand institutional capacities and governance mandates, particularly linked to urban sustainability. As such, it is an essential contribution to larger debates about what it takes to make cities more environmentally sustainable and the types of strategies and tactics that best advance progress on these fronts in both the short- and the long-term.

The State of Patenting at Research Institutions in Developing Countries: Policy Approaches and Practices - Pluvia Zuniga 2011

This study discusses the opportunities and challenges offered by patents to foster technology transfer from government funded research institutions in developing countries. It presents a review of policy frameworks and recent policy changes aimed to foster academic patenting and technology transfer in low- and middle-income countries. It then analyzes patenting activities by universities and public research organizations and compares these trends with respect to high-income countries. This analysis is complemented with an assessment of the current state of patenting and

technology commercialization practices in a selected group of technology transfer offices. The Divine Bureaucracy and Disenchantment of Social Life - Maznah Mohamad 2020-03-02 This book traces the expansion of Islamisation within a modern and plural state such as Malaysia. It elaborates on how elements of theology, sacred space, resources, and their interactivity with secular instruments such as legislative, electoral, and new social technological platforms are all instrumentally employed to consolidate a divine bureaucracy. The book makes the point that religious social movements and political parties are only few of the important agents of Islamisation in society. The other is the modern and secular state structure itself. Weber's legal rational bureaucracy or Hegel's ethical bureaucracy predominantly characterises a modern feature of governmentality. In this instance an Islamic bureaucracy is advantageously situated not only within an ambit of modernity and therefore

legality, but divinity and therefore sacrality as well. This positioning gives religious state agents more salience than any other form of bureaucracy leading to their unquestioned authority in the current contexts of societies with Muslim majority rule. One of the requisites of this condition is the homogenisation of Islam followed by ring-fencing of its constituents. The latter can involve contestations with women, other genders, 'secular' Muslims, non-Muslims as well as dissenting Muslims with their differing truthful 'Islams'.

Pests and Pathogens: Management Strategies - Vudem D. Reddy 2011-07-12

The need and demand to feed the ever-increasing global population pose major challenges for increasing crop productivity in an eco-friendly manner. The cultivation of crops under input-intensive conditions has however resulted in an enhanced vulnerability of high-yielding cultivars to a multitude of pests and pathogens at all phenological stages. The disease spectrum and intensity are continuously changing because of the dynamic nature of crop systems, pests and pathogens. Disease management has therefore become the major functional component of the crop production systems. This reference volume and manual covers the complete spectrum of current issues

in pest and pathogen disease management: Insect pests: pathogens of rice, sorghum, chickpea and castor and their management; Molecular marker-assisted breeding and transgenic crops for disease management; Management of forest insect pests; Effect of climate change on insects, pathogens, plants and pesticide usage; Botanicals & microbial pesticides and insect resistance to synthetic pesticides, and Integrated pest management and bioinformatics' solutions. The text is supported by a full color photograph section. Most chapters represent studies down in India and South East Asia. Scientists and practitioners working in other subtropical and tropical areas will also benefit from the information and strategies provided in this volume. Edited by three experienced specialists, this volume will benefit researchers and professionals in crop science, plant diseases and bioinformatics.
