Hollywood Highbrow Shyon Baumann 2018-06-05 Today's moviegoers and critics generally consider some Hollywood products--even some blockbusters--to be legitimate works of art. But during the first half century of motion pictures very few Americans would have thought to call an American movie "art." Up through the 1950s, American movies were regarded as a form of popular, even lower-class, entertainment. By the 1960s and 1970s, however, viewers were regularly judging Hollywood films by artistic criteria previously applied only to high art forms. In *Hollywood Highbrow*, Shyon Baumann for the first time tells how social and cultural forces radically changed the public's perceptions of American movies just as those forces were radically changing the movies themselves. The development in the United States of an appreciation of film as an art was, Baumann shows, the product of large changes in Hollywood and American society as a whole. With the postwar rise of television, American movie audiences shrank dramatically and Hollywood responded by appealing to richer and more educated viewers. Around the same time, European ideas about the director as artist, an easing of censorship, and the development of art-house cinemas, film festivals, and the academic field of film studies encouraged the idea that some American movies--and not just European ones--deserved to be considered art.

A Dynamic Balance Ann Dale 2010-10-01 *A Dynamic Balance* illuminates the importance of understanding the social dimension of sustainability as it examines the links between social capital and sustainable development within the overall context of local community development. Looking at case studies in both Australia and Canada, it draws upon lessons that can be learned to

reconnect large urban centres and smaller communities. Given the number of small communities in both countries struggling to diversify from single-resource economies in a context of increasing globalization, the analysis touches on several critical public policy issues. This is a timely and provocative call for reconciliation and reconnection within and between communities.

The Global Food Economy Tony Weis 2008-02-29 *The Global Food Economy* examines the human and ecological cost of what we eat. The current food economy is characterized by immense contradictions. Surplus 'food mountains', bountiful supermarkets, and rising levels of obesity stand in stark contrast to widespread hunger and malnutrition. Transnational companies dominate the market in food and benefit from subsidies, whilst farmers in developing countries remain impoverished. Food miles, mounting toxicity and the 'ecological hoofprint' of livestock mean that the global food economy rests on increasingly shaky environmental foundations. This book looks at how such a system came about, and how it is being enforced by the WTO. Ultimately, Weis considers how we can find a way of building socially just, ecologically rational and humane food economies.

Finding Callidora Stella Leventoyannis Harvey 2019-10 A horrific betrayal sets the destiny of the Alevizopoulos family, farmers who dare to choose a side, first in the Great War of 1914-1918, then in the Greco-Turkish war of 1919-1922. Theodore, the patriarch, was given a significant plot of fertile farmland in the Peloponnese for his efforts to fight the Ottomans in the Cretan revolution of 1886-1896. After he dies, it is Callidora, the matriarch, who must protect this legacy, raising her children to ensure the land is passed down from one generation to the next. But will the treacherous schemes of a neighbour ever allow this to happen? Survival might mean leaving what is most precious: home. Finding Callidora unfolds against multiple backdrops?the unforgiving terrain of the Anatolia, the isolated Greek islands of Naxos and Crete, the bustling, chaotic streets of Cairo and later the vast expanse of Canada. Reflecting the headlines of the day, the novel follows four generations of the Alevizopoulos family, starting with Callidora's children, Nikos, Vasilis and Katarina. Each will carry and pass on the scars of the original betrayal and their need to find the place where they belong.

At the Edge Ann Dale 2001 Ann Dale argues that hope for the future lies in sustainable development - the fundamental human imperative of the 21st century - but what is first required is a new framework for governance based on human responsibility and a recognition of the interconnectedness of human and natural systems.

Copahue Volcano Franco Tassi 2015-09-21 This book provides a comprehensive description of the volcanological, petrological and geochemical features of the Copahue volcano, located at the border between Argentina and Chile. Scientific studies are limited for this volcanic system, due to its remote location and difficult access in winter. However, Copahue is one of the most active volcanic systems in the southern Andes. Monitoring the volcano's activity is of utter importance, as it provides means of existence for the nearby village of the same name, hosting the world's highest-located hot-springs

resort. This book's aim is to present the current monitoring activities, and to describe future research programs that are planned in order to mitigate volcanic hazards. Special attention is therefore devoted to the social and industrial activities close to the volcano, such as health therapies and geothermal energy exploitation. In a special section, the Copahue volcano is presented as a terrestrial modern analog for early-Earth and Mars environments.

Robert Latimer Gary Bauslaugh 2010-09-16 In October 1993, Robert Latimer, a Saskatchewan farmer, decided to end the life of his chronically ill daughter rather than subject her to another painful surgery. Tracy, who had the mental capacity of a five-month-old infant, was twelve at the time of her death. She had already endured multiple operations to correct conditions caused by her severe cerebral palsy. Tracy's death and the charge of murder laid against Robert Latimer set in motion Canada's most famous and controversial case of "mercy killing." The case sparked a national debate about euthanasia and the rights of the severely disabled that continues today. Author Gary Bauslaugh takes us back to the beginning of this case, describes its explosion on the national scene during two highly publicized trials, and looks at later conflicts surrounding Latimer's parole hearing. In clear, insightful prose, Bauslaugh discusses the conflicting views of Latimer's sympathizers and detractors in chapters that explore the ethical dilemmas as well as the legal issues that this case has raised. As a reporter who has followed the case from its beginnings and interviewed Latimer multiple times during his imprisonment and subsequent parole, Bauslaugh's intimate knowledge of the personalities and facts of this difficult case allow him to write a revealing and informed book.

Andre swims with Harry and rides happily in the back seat of Harry's car. He quickly picked up tricks—perhaps the first time a wild animal has been trained in a free-release situation. Year after year, Andre swam south in the winter, only to return again to Harry the next spring. It's a timeless and iconic Maine story.

The Cambodian Room Tommaso Lusena de Sarmiento 2013-01-07 Magnum photographer Antoine DAgata has become a little too intimate with the subject of his photo series. In order to get to know the seamy side of Cambodia, he goes to the end of the end. In Phnom Penh, he moves in with a drug-addicted prostitute named Lee, who not only allows DAgata to photograph her, but shares her crack pipe and her bed with him as well. When she asks him what he really wants from her, he admits that he hopes the pictures will earn him money. DAgata has been throwing himself into projects like this for twenty years now, despite the fact that he is blind in his right eye and myopic in his left. This has not stood in the way of his career as a photographer of the subclass. On the contrary, It's the darkness that brought me up. The film camera employs a similar observational yet alienating style, following the couple from up close while they spend weeks in a stuffy room, in voluntary confinement. The claustrophobic atmosphere of this documentary debut is interspersed with gruesome street shots and uncompromising photos by DAgata, who has increasing doubts about his profession as a photographer. Journalist Philippe Azoury is worried and comes

for a visit, forcing DAgata to question his unorthodox working method. Together, they discuss the emotional life that underlies the photographers work.

Murder by Injection Eustace Clarence Mullins 2016-04-21 The present work, the result of some forty years of investigative research, is a logical progression from my previous books: the expose of the international control of monetary issue and banking practices in the United States; a later work revealing the secret network of organizations through which these alien forces wield political power—the secret committees, foundations, and political parties through which their hidden plans are implemented; and now; to the most vital issue of all, the manner in which these depredations affect the daily lives and health of American citizens. Despite the great power of the hidden rulers, I found that only one group has the power to issue life or death sentences to any American—our nation's physicians. I discovered that these physicians, despite their great power, were themselves subjected to very strict controls over every aspect of their professional lives. These controls, surprisingly enough, were not wielded by any state or federal agency, although almost every other aspect of American life is now under the absolute control of the bureaucracy. The physicians have their own autocracy, a private trade association, the American Medical Association. This group, which is headquartered in Chicago, Illinois, had gradually built up its power until it assumed total control over medical schools and the accreditation of physicians. The trail of these manipulators led me straight to the same lairs of the international conspirators whom I had exposed in previous books. I knew that they had already looted America, reduced its military power to a dangerously low level, and imposed bureaucratic controls on every American. I now discovered that their conspiracies also directly affected the health of every American. This conspiracy has resulted in a documented decline in the health of our citizens. We now rank far down the list of civilized nations in infant mortality and other significant medical statistics. I was able to document the shocking record of these cold-blooded tycoons who not only plan and carry out famines, economic depressions, revolutions and wars, but who also find their greatest profits in their manipulations of our medical care. The cynicism and malice of these conspirators is something beyond the imagination of most Americans. They deliberately mulct our people of millions of dollars each year through "charitable" organizations and then use these same organizations as key groups to bolster their Medical Monopoly. Fear and intimidation are the basic techniques by which the conspirators maintain their control over all aspects of our health care, as they ruthlessly crush any competitor who challenges their profits. As in other aspects of their "behavioural control" over the American people, their most constantly used weapon against us is their employment of federal agents and federal agencies to carry out their intrigues. The proof of this operation may be the most disturbing revelation of my work.

Project Based Teaching Suzie Boss 2018-09-20 It's no secret that in today's complex world, students face unparalleled demands as they prepare for college, careers, and active citizenship. However, those demands won't be met

without a fundamental shift from traditional, teacher-centered instruction toward innovative, student-centered teaching and learning. For schools ready to make such a shift, project-based learning (PBL) offers a proven framework to help students be better equipped to tackle future challenges. Project Based Teachers encourage active questioning, curiosity, and peer learning; create learning environments in which every student has a voice; and have a mastery of content but are also comfortable responding to students' questions by saying, "I don't know. Let's find out together." In this book, Suzie Boss and John Larmer build on the framework for Gold Standard PBL originally presented in *Setting the Standard for Project Based Learning* and explore the seven practices integral to Project Based Teaching: Build the Culture Design and Plan Align to Standards Manage Activities Assess Student Learning Scaffold Student Learning Engage and Coach For each practice, the authors present a wide range of practical strategies and include teachers' reflections about and suggestions from their classroom experiences. This book and a related series of free videos provide a detailed look at what's happening in PBL classrooms from the perspective of the Project Based Teacher. Let's find out together. Nicolás Guagnini: Theatre of the Self Alaina Claire Feldman 2020-10-08

Nicolás Guagnini: *Theatre of the Self* is a hybrid catalogue-reader based on the exhibition of the multi-threaded performances of Buenos Aires-born New York-based Guagnini. Many of these works, spanning from 2005 until 2019, have never been seen before or have not been seen since their original live presentation. Raised in Argentina during the "Dirty War" and violent military dictatorship, Guagnini moved to New York in the late 1990s and co-founded the film production company Union Gaucha Productions with Karin Schneider in 1997. In 2005 Guagnini became co-founder of Orchard Gallery, an artist cooperative based on the Lower East Side. The work in *Theatre of the Self* is informed in part by autobiography, history, politics and through Guagnini's community itself. Some performances were participatory, some were not. But all were made polyvocally in collaboration with a group of artists with shared interests and concerns around performance and the moving image including Ei Arakawa, Leigh Ledare, Jeff Preiss, Aura Rosenberg, Karin Schneider among others. This publication invites internationally acclaimed art historians, curators and artists to think about the material in Guagnini's work within a unique format. Readers of the publication will be interested in contemporary art, film, political science, performance studies, and Latin American studies.
